

AI-Driven Multi-Vendor Network Security Compliance Auditor

Evidence-First Compliance Report

1. Executive Summary

Vendor	cisco_iosxe
Hostname	demo-cisco-noncompliant
Device Model	Not available
Serial Number	Not available
Configuration Version	17.9
Analysis ID	032a363e-868d-4060-921e-c1e95431f370
Analysis Date	Not available in stored response
Report Generated At	2026-09-02T01:27:57.790900+00:00

PASS	FAIL	UNKNOWN	N/A
0	4	0	0

Compliance decisions were produced by the deterministic control engine. AI-assisted mappings do not directly determine compliance.

2. Control Results

Control ID	Control Name	Result	Evidence
CTRL-001	Secure management transport	FAIL	Available
CTRL-002	Audit logging enabled	FAIL	Available
CTRL-003	Secret protection enabled	FAIL	Available
CTRL-004	Time synchronization configured	FAIL	Available

The table above reproduces stored control results. The report generator does not recalculate compliance.

3. Evidence Details

Evidence 1: CTRL-001 | management.ssh_enabled

Control	CTRL-001 Secure management transport
Property	management.ssh_enabled
Expected	true
Actual	false
Result	FAIL
Source File	noncompliant.conf
Line	8-8
Raw Excerpt	transport input telnet
Explanation	management.ssh_enabled was False, but the expected value is True.
Evidence Source	CONFIGURATION

Evidence 2: CTRL-001 | management.telnet_enabled

Control	CTRL-001 Secure management transport
Property	management.telnet_enabled
Expected	false
Actual	true
Result	FAIL
Source File	noncompliant.conf
Line	8-8
Raw Excerpt	transport input telnet
Explanation	management.telnet_enabled was True, but the expected value is False.
Evidence Source	CONFIGURATION

Evidence 3: CTRL-002 | logging.enabled

Control	CTRL-002 Audit logging enabled
Property	logging.enabled
Expected	true
Actual	false
Result	FAIL
Source File	noncompliant.conf

Line	5-5
Raw Excerpt	no logging buffered 16384
Explanation	logging.enabled was False, but the expected value is True.
Evidence Source	CONFIGURATION

Evidence 4: CTRL-003 | password_protection.enabled

Control	CTRL-003 Secret protection enabled
Property	password_protection.enabled
Expected	true
Actual	false
Result	FAIL
Source File	noncompliant.conf
Line	4-4
Raw Excerpt	no service password-encryption
Explanation	password_protection.enabled was False, but the expected value is True.
Evidence Source	CONFIGURATION

Evidence 5: CTRL-004 | time_sync.ntp_enabled

Control	CTRL-004 Time synchronization configured
Property	time_sync.ntp_enabled
Expected	true
Actual	false
Result	FAIL
Source File	noncompliant.conf
Line	6-6
Raw Excerpt	no ntp server 192.0.2.10
Explanation	time_sync.ntp_enabled was False, but the expected value is True.
Evidence Source	CONFIGURATION

4. Analysis Lineage

Parent Analysis	Not available
Current Analysis	032a363e-868d-4060-921e-c1e95431f370
Re-analysis	NO
Mapping	Not available
Mapping Version	Not available

Final Disclaimer

This report represents the results of the implemented prototype controls and available evidence at the time of analysis.

UNKNOWN indicates that sufficient evidence was not available for a deterministic conclusion.

AI-assisted interpretation does not independently establish compliance.

Remediation demonstrated by this prototype is simulation-only. No production device configuration is modified.

This report is not a certification and does not represent every possible security control.
